Lakshmi Priya	East Point College of Engineering and Technology was not popular name back then. Now, after the new principal Dr Prakash has taken charge, the whole scenario of the College is changed. Goals of college have changed and are concentrating more on industry oriented programs like Salesforce, AWS, UIPATH and VMWRE. We can see lot of companies are visiting our college like TCS, Infosys, Wipro, Cognizant and much more. Currently I am in 7th Sem, CSE dept and I am proud say that I am student of EPCET, I have been placed in Infosys. These 4 years of journey is wonderful.

anjali kumar	East Point College of Engineering and Technology provides you good exposure to technologies and the industrial insights. There are several industry driven programs that help the students like RPA, salesforce, VMware and AWS. These programs not just help in the exposure, but are also providing conversions in the placement aspects, thanks to Principal sir and training and placement officer, who have worked really hard to achieve these tremendous results. Many students are already placed in many companies like TCS, Infosys, Mphasis, etc
Vignesh R	East Point has a vibrant college environment. Four years in this College has been beautiful for me. I've had a crazy ride in this college. The placement department works hard day in day out for the benefit of the students. East Point also supports sports activities in the college along with many cultural activities. This way East Point tries its best to keep the students on their toes and get all the awesome experience. It is one of the best colleges to recognize enjoyment as well as academics. I am privileged to be a part of this esteemed institution. This is coming from a final year student currently in my 7th semester with loads of respect to this college.
Sumaiya Kouser	College is well maintained with good infrastructure and campus. It has quality education with good supporting faculty. The education is good and placement opportunities are too good. Thanks to the current principal who has made so many improvements in the college.
HERSCHELLE SARASWAT	East Point College of Engineering and Technology provides you good exposure towards the in-trend technologies and the industrial insights, which are the parameters that basically every future Engineer looks out for in this rapidly changing world. There are several industry driven programs that help the students. These programs not just help in the exposure, but are also providing conversions in the placement aspects, thanks to Principal sir and training and placement officer, who have worked really hard to achieve these tremendous results. Many students are already placed, including myself in Infosys.
sidraik itkar	One of the best colleges for placements. College has tied up with many companies for certification courses. Separate Classes are conducted to train the students for these certification courses. Everything under one roof. Great infrastructure. College has never seen in history such drastic changes. All this happened once the college got new Principal. His efforts will never go in vain. I am currently in 7th sem CSE and I am placed in TCS. Classes for interview preparation are also provided in the college.
Heera S	A peaceful place, Amazing campus, very good canteen and bus facilities. Friendly lecturers, and the SAMSKRUTHI Fest celebration is the BEST!!! A lot of club activities, and illuminati team is very active. All the cultural festivals are celebrated. Workshops on trending technologies are conducted within the campus.
